ACCESSORIES FOR MODEL AUP-500L

The Remote Display Unit is a useful accessory which provides an easy to read numeric display of temperature recorded. The display numerals consists of LEDs assembled in an array to form 6 inch high characters. When a reading is taken, this unit receives serially pulsed data on a simple two wire connection. The Temperature is clearly displayed and if the unit is mounted at a suitable height, the reading can be visible to all on the shop floor.

REMOTE DISPLAY UNIT
MODEL : ARD-02
230 x 432 x 160 (H x W x D)

The lamps indicate "READY", "MEASUREMENT IN PROGRESS" AND "MEASUREMENT OVER", using the relay outputs of the Model AUP-500. These indications are of great help to the operator, as they indicate whether the thermocouple is properly inserted into the lance before taking a reading and also whether the reading was completed without thermocouple burn out; in case the thermocouple becomes open before the sampling process is complete "Measurement Over" will not be indicated

REMOTE STATUS INDICATOR WITH LAMPS
MODEL : ASI-02
150 x 465 x 175 (H x W x D)

WALL MOUNTING PANEL
MODEL : CP-04
450 x 700 x 300 (H x W x D)

The CP-04 wall-mounting Panel is an optional accessory. It houses the AUP-500L, Molten Steel Temperature Measuring System. It has the three Status Indication Lamps, Hooter and Thermocouple socket on the front panel. The panel is completely wired. The opening is from the front.
